Risk disclosure

Required reading before purchase or reliance (v1.0.9).

This product is provided for educational purposes only and is not investment advice. Trading and investing in crypto assets involves substantial risk, including the risk of total loss.

Key risks

- Volatility: prices can move rapidly and unpredictably.
- Liquidity and slippage: execution prices can differ materially from expectations.
- Exchange and custody risk: counterparty failures and operational issues can occur.
- Model risk: indicators can be wrong, can lag, and can fail in new regimes.
- Data differences: feeds can vary across exchanges and TradingView symbols.

No guarantees

Past performance, examples, and backtests (if any) are hypothetical and not guarantees of future results. You are responsible for your decisions, sizing, and risk limits.

If you rely on alerts or labels without a written plan (entries, exits, position sizing, and risk controls), do not use this tool.
