

Risk Disclosure Statement

Azro Labs LLC d/b/a Azro Systems™,
(the "Company," "we," "us," or "our")

- Market Risk – Digital asset prices are highly volatile; you can lose your entire investment.
- No Guaranteed Results – Past performance of any trading strategy, indicator, or methodology is not indicative of future outcomes.
- Back-Testing Caveats – Simulated results may under-represent slippage, liquidity constraints, and psychological factors.
- Leverage – Using margin or derivatives magnifies both gains and losses.
- Regulatory Uncertainty – Legal frameworks for cryptocurrencies can change without notice, impacting market conditions.

FinCEN MSB Status – Azro Labs LLC d/b/a Azro Systems develops read-only market-cycle analytics software. Because the product neither accepts nor transmits value, the Company is not a Money-Services Business under FinCEN Guidance FIN-2013-G001 and FIN-2019-G001 and therefore is not required to register as an MSB.

- Not Investment Advice – Information is provided for educational purposes only and should not be construed as personalized financial advice. Not Registered Investment Advisor – The Company is not registered with the SEC or any state regulator.
- Personal Responsibility – You are solely responsible for evaluating the merits and risks associated with use of our tools.

Performance & Timing

- Data-feed dependent. The promise that labels and alerts appear "before the weekly bar closes" assumes normal TradingView® data-feed operation and internet connectivity. Outages or exchange halts can delay signals.
- EARLY heads-ups may appear intra-bar and may disappear if weekly conditions fail to confirm; confirmations stamp at the weekly close.
- No guaranteed results. Past performance and back-test statistics do not guarantee future outcomes. Signals are probabilistic decisions-support tools only, not investment advice.

Reliability Disclaimer

- Data-feed interruptions e.g., TradingView discontinues or suspends any essential reference series.
- Liquidity fragmentation Exchange delistings, regional trading bans, or other events that distort unified price discovery.

- Regime shifts Sustained compressions or spikes in volatility, depth, or participant mix that fall outside prior norms.
- Persistent behavioral changes Long-lasting shifts in how capital circulates among major digital-asset segments.
- Off-label usage Running the script on unsupported symbols, synthetic feeds, or time frames outside recommended bounds.

Azro Systems™ monitors these risk factors but makes no warranty—express or implied—that signals will remain reliable under all conditions. Users must validate outputs in real time, apply prudent risk-management practices, and supplement them with independent analysis before making any trading decision. Past performance is not indicative of future results.

Trademark & Third-Party Credits

TradingView® charts and screenshots are used under fair-use / brand-attribution principles.

All other trademarks—including 3Commas, TradersPost, PineConnector—belong to their respective owners. We receive no compensation for these mentions.

Additional Risk Factors (Summary)

This summary supplements the full Risk Disclosure Statement and highlights key risks associated with using rules-based indicators and automated alerts:

- No personalized advice or fiduciary duty — Materials are educational only and do not take your circumstances into account. You are solely responsible for trading decisions.
- Market, liquidity, and execution risks — Fast markets, gaps, spreads, and venue outages can lead to slippage far beyond backtests or expectations. Orders may not fill at quoted prices.
- Regime shifts and structural breaks — Sudden changes in market structure, volatility regimes, correlations, liquidity, or policy/technology (e.g., protocol upgrades, exchange failures, regulatory actions) can invalidate prior relationships and materially degrade indicator performance.
- Model limitations — Indicators can be curve-fit or regime-dependent. Backtests may omit fees, funding, taxes, and partial fills. Parameters that worked historically can underperform.
- Data quality and latency — Third-party data, charting, or connectors may be delayed, revised, or interrupted, affecting signals and results. We do not warrant accuracy or availability.
- Leverage and derivatives — Margin, futures, and perpetual swaps magnify gains and losses; you can lose more than your initial capital.
- Conflicts of interest — We or our affiliates may hold positions in instruments discussed. Positions can change without notice.
- Jurisdiction and eligibility — Nothing herein is a solicitation in any jurisdiction where such solicitation or offer would be unlawful. Ensure access and use are legal where you are.
- Taxes — Trading can have tax consequences. Consult a qualified tax professional.

Educational only. Trading involves risk; hypothetical results have limitations. See Master Disclaimer & Notices.
