My name is Jordan Anthony Tobias, I'm 22 years old and currently incarcerated in Jerome Correctional Facility. Since I've been A teenager I have been arrested countless times for petit larceny "crimes", and I have served endless months in both the Juvenile and Adult Judicial Systems. If I said I was A stranger to the system I would be wrong. My understanding is A Jail or prison term is to punish [illegible] young men, with the goal to lower the chance [illegible] perspective [illegible] happening [illegible] The [illegible] most of us [illegible] Young men new to Jail look up to these guys, idolize them if you will. They look for them for guidance [illegible]. But whats happened is these [illegible] to this lifestyle. They get face tattoos try to act tough to impress others, usually resulting in the [illegible] Jail. I believe there a number of factor at play here resulting in the complete and utter failure of the Judicial system. The cliche saying lock them up in cages they'll act like animals has an astonishing truth to it. I'm not saying to let criminals go but some petitions need to be implemented. My opinion is of course people of petit larceny [illegible] crimes. These people present included usually are suffering from [illegible] and [illegible] I [illegible]

not lie in flooding the Jails and prisons ~~mixing~~ people who all to often had A small amount of substance on them, and mixing them long term with murders, rapist, theives, and violent gang members. Back to the concerns about recidivism, I aknowledge felons get out and commit more felonies is A major problem. So I ask this, while they are incarcerated what vocational, educational, services are offered? The answer: next to none. In county Jail the only educational programs available is the khan accademy on the tablet. A great app providing free education to all except its not free inmates are being exploited at 5¢ a minute to have access to A free educational app. Making us again the victim of A corrupt for profit system. I firmly believe there needs to be A complete overhaul of the system, if anyone ever expects to see true progress. Starting with the simplist thing like The khan accademy and other educational, and vocational services, I believe can be the foundation and building blocks for A new and improved Judical system. Give these guys the ability and options to better themselves, Something to work on or to motivate them. What's there to lose. I am the product of A misguided for profit system, You may see this as the rambling of an inmate, or I.D.O.C. #125566. But I'm Just A guy trying to better himself in an unhealthy and unstable enviorment. My name is Jordan Tubbs, this is my testimony. served 5+ years
