Jerome County Correctional facility. 1-7-23

My name is Patrick White Hawk J.R I am 38 years old and I have been in and out of jail most of my life mostly in one county where I spent most of my adult life Jerome County, Jerome Idaho. I moved off the reservation to Idaho when I was 15 years old to start a better life but it didn't quite work out to much in my favor due to my poor choices. I do have my G.E.D but I earned it in the prison programs they offered me, but I usually did most my time in county jail, Jerome specifically. The life long experiences I had in jail was mostly, war stories amongst other inmates, drugs, fighting, crime stories, just better ways to commit more mistakes in life to continue the cycle of returning to jail. County jail wouldn't do better if there was educationally ways to better our thinking and mindset to live a better life. Even as adults we still can learn to change and learn new ways of life, if we had the tools offered to learn. With free educational tools offered to us will help so much in my opinion. Even to learn a new trade in life, besides learning new criminal ways. So at the end of the day we are all gonna be a better person for our families. So I think if I had better access to education or job training programs this cycle of incarceration probably would have been a lot less for me.
