BTC ALLOCATION OPERATING SYSTEM

MAP THE CYCLE. CUT THE NOISE.

Invite-only TradingView indicator • Non-custodial • Built for repeatable Bitcoin allocation

BTC Operating System

A cycle-aware Bitcoin allocation framework engineered to turn volatility into a repeatable operating process.

ACTION	BUY $23.62	MARKET	NEUTRAL
MODE	Adaptive	PROFILE	Aggressive (BTC-max)
THIS WEEK		TF: 1W	
Base	BUY ~$23.62.	Sim	BUY $23.62
ENGINE SNAPSHOT			
Deposited	$25,900	Cash	$16,740
BTC	7.759	Avg cost	$9,008
Cash BTC-eq	0.2374	Buffer	$1,000
PROOF VS AUTO-BUY			
AZRO BTC-eq	7.997	Auto BTC-eq	3.754
x vs Auto	×2.13	Extra sats	424.32M
Accretion	8.62%/yr		

Adaptive mode • aggressive BTC-max profile • weekly dashboard snapshot

BUY

HOLD

TRIM (optional)

- Clear action + suggested amount
- Dashboard-first workflow built to be acted on
- Built-in accountability vs a simple auto-buy baseline

OUTPUT

SIZING

ACCOUNTABILITY

Clear next step

BUY / HOLD / TRIM resolved without chart clutter.

Amount guidance

Each action includes a suggested amount sized to your plan.

Proof vs auto-buy

Audit BTC-equivalent progress and extra sats versus a simple baseline.

Turn volatility into an operating process

The dashboard resolves cycle context into a calm, repeatable decision path you can actually follow.

ACTION	BUY $23.62	MARKET	NEUTRAL
MODE	Event	PROFILE	Aggressive (BTC-max)
THIS WEEK		TF: 1W	
Base	BUY ~$23.62.	Sim	BUY $23.62
ENGINE SNAPSHOT			
Deposited	$25,900	Cash	$13,003
BTC	7.102	Avg cost	$7,453
Cash BTC-eq	0.1844	Buffer	$1,000
PROOF VS AUTO-BUY			
AZRO BTC-eq	7.286	Auto BTC-eq	3.754
× vs Auto	×1.94	Extra sats	353.24M
Accretion	7.52%/yr		

1 STEP 1

Read the market

Cycle context and risk state stay visible without turning the chart into noise.

2 STEP 2

Follow the policy

Mode + profile govern behavior before emotion gets to negotiate with you.

3 STEP 3

Execute the amount

The output resolves to a clear action plus a suggested size you can actually follow.

Four modes. One operating discipline.

Choose the policy that matches your philosophy without learning a new interface.

ACTION	BUY $23.62	MARKET	NEUTRAL
MODE	Stack	PROFILE	Aggressive (BTC-max)
THIS WEEK		TF: 1W	
Base	BUY ~$23.62.	Sim	BUY $23.62
ENGINE SNAPSHOT			
Deposited	$25,900	Cash	$3,533
BTC	4.878	Avg cost	$4,585
Cash BTC-eq	0.0501	Buffer	$1,000
PROOF VS AUTO-BUY			
AZRO BTC-eq	4.928	Auto BTC-eq	3.754
× vs Auto	×1.31	Extra sats	117.49M
Accretion	3.02%/yr		

STACK

Buy-only accumulation

For operators who want disciplined re-engagement without trims.

ACTION	BUY $23.62	MARKET	NEUTRAL
MODE	Adaptive	PROFILE	Aggressive (BTC-max)
THIS WEEK		TF: 1W	
Base	BUY ~$23.62.	Sim	BUY $23.62
ENGINE SNAPSHOT			
Deposited	$25,900	Cash	$16,740
BTC	7.759	Avg cost	$9,008
Cash BTC-eq	0.2374	Buffer	$1,000
PROOF VS AUTO-BUY			
AZRO BTC-eq	7.997	Auto BTC-eq	3.754
× vs Auto	×2.13	Extra sats	424.32M
Accretion	8.62%/yr		

ADAPTIVE

Trim-capable discipline

Optional trims in elevated-risk conditions plus structured re-engagement behavior.

ACTION	BUY $23.62	MARKET	NEUTRAL
MODE	Event	PROFILE	Aggressive (BTC-max)
THIS WEEK		TF: 1W	
Base	BUY ~$23.62.	Sim	BUY $23.62
ENGINE SNAPSHOT			
Deposited	$25,900	Cash	$13,003
BTC	7.102	Avg cost	$7,453
Cash BTC-eq	0.1844	Buffer	$1,000
PROOF VS AUTO-BUY			
AZRO BTC-eq	7.286	Auto BTC-eq	3.754
× vs Auto	×1.94	Extra sats	353.24M
Accretion	7.52%/yr		

EVENT

Rarer high-attention windows

Optional adjustments for operators focused on exceptional cycle conditions.

ACTION	HOLD	MARKET	NEUTRAL
MODE	Performance	PROFILE	Managed preset
THIS WEEK		TF: 1W	
Base	HOLD.	Sim	none
ENGINE SNAPSHOT			
Deposited	$25,900	Cash	$3.28M
BTC	0	Avg cost	$0
Cash BTC-eq	46.51	Buffer	$1,000
PROOF VS AUTO-BUY			
AZRO BTC-eq	46.507	Auto BTC-eq	3.754
× vs Auto	×12.39	Extra sats	4.28B
Accretion	31.67%/yr		

PERFORMANCE

Aggressive BTC-eq behavior

For users comfortable with higher timing risk rather than strict always-hold exposure.

Built-in accountability vs auto-buy

Audit BTC-equivalent progress, x vs auto-buy, and extra sats directly on chart.

AZRO BTC-EQ

Accretion	31.67%/yr		

GOVERNANCE

A baseline you can audit

Most products sell confidence. This system shows its work against a simple auto-buy benchmark so you can verify whether the process is actually helping.

STANDARDIZED EXAMPLE SNAPSHOT

BTCUSD 1W • Jan 2017–Mar 2026 • $50/week contributions • $1,000 cash buffer • 0.10% fees • pre-tax. Backtests are hypothetical, sensitive to assumptions, and do not guarantee future performance.

Non-custodial. Invite-only. Operator-first.

No keys. No exchange connections. No auto-trading. You stay in control.

Non-custodial

The system never touches your wallets, keys, exchange accounts, or execution.

Operational tooling

Alerts, a clean dashboard, docs, and versioned upkeep turn signals into a workflow.

ACCESS FLOW

1. **Buy the license on Gumroad**

   Purchase access to the invite-only TradingView script.

2. **Provide your TradingView username**

   Add it at checkout or email support with the purchase email if you forgot.

Built for governance

A reviewable process beats improvisation when volatility is high.

3

Access appears under Invite-only scripts

Once the username is added, the indicator is available directly inside TradingView.

Support: support@azrosystems.com • Access is typically granted within 24 hours on business days.

Built for disciplined Bitcoin allocators

This is an operating process for long-horizon execution — not a chart toy.

FOR

Long-horizon accumulators

- Structured BTC sizing instead of emotional allocation.
- Readable, dashboard-first decisions instead of chart clutter.
- Hybrid operators who want optional trims without abandoning policy.

NOT FOR

Constant action or automation

- Intraday signals, scalping, or entertainment trading.
- Exchange connections, bots, or auto-execution.
- Altcoin rotation workflows or short-term impatience.

BUILT TO DO

Replace improvisation with policy

- Keep behavior auditable versus a simple baseline.
- Turn volatility into a repeatable allocation process.
- Support calmer execution across future cycles.
