my name is Patrick Wayne Anderson I am 36 years old my Inmate number is 116101. I caught my first felony here in Idaho in 2014 Ive done a rider and also 5 years for my 2nd felony in the Idaho department of Corrections. So my total time spent in Idaho jails and prisons is over 10 years. Im writing this letter because I have been offered nothing to be able to better myself and to not come back to this life style. I never graduated high school I have no G.E.D and I am ready to change my life I need to start with my education and have No resources to do it. Ive been to 3 different County jails in Idaho alone and everyone of them lack free education to help better our lives some of us would love the opertunity to not come back and education would be a great start. I have been in Jerome County jail for 20 months with nothing to better myself no good books. No education, there is a few programs that are church based but they are hit or miss because of Covid so nothing is consistent its all hit or miss. there are no other programs available to the inmates. this is a very unproductive environment with having 15 people per unit with nothing to do. the state needs to do alot better to make this a Correctonal facility

and if they want it to be succesful. We need access to free education and all the tools we can get to help us set goals and to be able to plan are future if we want to be a better member of society. If we dont have resources to better ourselves upon realese that is setting us up for failure I feel like. If we are treated the way they treat us and keep treating us we are gonna mentally come out the same or worse then we are now and we are gonna end up coming back and it just continues to be the same everyday. Locking us up in a room with nothing to do and nothing to occupy are minds is not the answer to corrections and its costing tax payers money and seems like there money could goto helping corrections if it is gonna go anywhere. So technology is getting more advanced by the day and could also be used to create a more productive enviroment in all correctional facilitys so maby we should take advantage of it. Free education in all facilites would be a really good start to a big change it is possible and needs to happen if we want to better are society and also if you want to see positive change in the world today. As I write this letter please

think about how you can help a guy like me and many others who need this and want this more then anything. thank you for your time and patients.
